RODGERS BIWOTT

PLATFORM & PRODUCTION SUPPORT ENGINEER | DEVOPS | CLOUD & KUBERNETES

Nairobi, Kenya | 0706346215 | rodgersbiwott2016@gmail.com | linkedin.com/in/rodgersbiwott | github.com/kiplongu | kiplongu.github.io

PROFESSIONAL SUMMARY

Platform, DevOps and Production Engineer with 7+ years of experience supporting and operating business-critical application platforms across AWS, Azure, Linux and Kubernetes. Hands-on experience with CI/CD, Docker/Kubernetes, PostgreSQL and SQL Server, Kafka, REST APIs, observability, production incident troubleshooting, deployments, rollback and disaster recovery. Strong background in platform reliability, secure software delivery, Linux/networking, TLS and certificates, secrets management, Terraform/IaC and automation with Bash, Python and PowerShell.

CORE EXPERTISE

Production Support & Incident Response | Linux & Networking | Kubernetes/Docker/OpenShift | Jenkins, Azure DevOps & GitLab CI/CD | AWS & Azure | PostgreSQL/SQL Server | Kafka | REST APIs & JSON | Prometheus/Grafana/ELK/OpenTelemetry | Deployments & Rollback | RCA & Reliability Engineering | TLS/Certificates/Secrets | Terraform & Ansible | Backup, Restore & Disaster Recovery

PROFESSIONAL EXPERIENCE

Senior DevOps & DevSecOps Engineer | **Avantech Ltd** | **Remote** | Nov 2025 - Present

- Designed and maintained Jenkins and Azure DevOps CI/CD workflows across 70+ repositories, standardizing build, automated testing, security validation, artifact publishing, deployment and rollback processes.
- Implemented Kubernetes and Helm delivery patterns with ArgoCD/GitOps, immutable image digests, controlled environment promotion, drift detection/self-healing and documented rollback/break-glass procedures for platform projects.
- Implemented platform security and reliability controls including RBAC, ServiceAccounts, NetworkPolicy patterns, pod security contexts, non-root containers, seccomp, resource requests/limits, health probes, HPA, PodDisruptionBudgets and topology-spreading patterns; worked with Kyverno and external secret-management patterns.
- Implemented PostgreSQL-backed platform capabilities including migrations, connection pooling, Row-Level Security for tenant isolation, encrypted backup workflows, SHA-256 integrity verification and automated restore verification, with S3-compatible object-storage patterns.
- Built observability using OpenTelemetry, Prometheus, Grafana, Loki and Tempo, applying SLIs/SLOs, error budgets, burn-rate alerting and Four Golden Signals to platform health and incident troubleshooting.
- Embedded DevSecOps controls using SonarQube, Trivy, CodeQL, OWASP ZAP, Dependency-Check, Checkov and secret scanning, with SBOM/provenance patterns and Vault/least-privilege secret handling.
- Supported SSO/authentication and access-control patterns using Keycloak and OAuth2 Proxy, and automated infrastructure/environment configuration using Terraform, Ansible, PowerShell and Bash.

Senior DevOps Engineer | **Crafted Systems Ltd** | **Nairobi, Kenya** | **Jan 2025 - Oct 2025**

- Bootstrapped and operated highly available RKE2 Kubernetes clusters on bare metal using Ansible, Kube-VIP and MetalLB; operated Longhorn, Ceph, MinIO and Redis services.
- Implemented ArgoCD and Jenkins delivery pipelines with security validation, Vault-based secret delivery, Prometheus/Grafana/OpenTelemetry observability and KEDA/HPA scaling for Kafka workloads.
- Supported platform availability, deployment troubleshooting, networking, storage, capacity and recovery across Kubernetes-hosted services.

Senior DevSecOps Engineer | **Nathan Digital** | **Nairobi, Kenya** | **Jul 2023 - Dec 2024**

- Automated AWS infrastructure across EC2, ECS and EKS using Terraform, Ansible and Python, improving repeatable cloud provisioning and supporting migration from EC2/Docker Swarm to ECS/EKS.
- Implemented GitOps and CI/CD security gates with ArgoCD, SonarQube, Trivy, OWASP ZAP, Checkov and InSpec; built Prometheus, Grafana and OpenTelemetry observability and applied Kubernetes/cloud security controls.
- Supported production troubleshooting across deployments, application configuration, networking and Kubernetes/cloud infrastructure, working with cross-functional teams to restore service and improve reliability.

DevOps Engineer | **Uamuzi Foundation** | **Nairobi, Kenya** | **Apr 2022 - Jun 2023**

- Automated Azure infrastructure delivery with Terraform and ArgoCD GitOps; operated Docker/Kubernetes workloads behind NGINX Ingress and improved reliability through Prometheus and Grafana monitoring.

DevOps Engineer | **ISON Technologies** | **Nairobi, Kenya** | **Apr 2019 - Mar 2022**

- Built Jenkins/Git/Maven/Ansible CI/CD pipelines and automated AWS EKS and Azure AKS deployments using Docker, Kubernetes and Terraform.
- Implemented NGINX Ingress, cert-manager, MetalLB, HashiCorp Vault and Prometheus/Grafana/ELK observability for secure and reliable application operations.

EDUCATION & CERTIFICATIONS

Bachelor of Science in Information Communication Technology - Jaramogi Oginga Odinga University of Science and Technology (JOOUST), Second Class Upper Division

Certified Kubernetes Administrator (CKA) | Kubernetes and Cloud Native Associate (KCNA) | Prometheus Certified Associate (PCA) | AWS Certified SysOps Administrator | Oracle Cloud Infrastructure DevOps Professional | Oracle Cloud Infrastructure CyberOps Associate | Linux Foundation DevSecOps Training

TECHNICAL SKILLS

Cloud & IaC: AWS, Microsoft Azure, Oracle Cloud Infrastructure, Terraform, Ansible, AWS/EKS architecture, S3-compatible object storage

Containers & Platform: Docker, Kubernetes, RKE2, AKS, EKS, OpenShift, Helm, ArgoCD/GitOps, Istio, NGINX Ingress, KEDA, HPA, PDB, topology spreading, health probes

Kubernetes Security: NetworkPolicies, RBAC, ServiceAccounts, pod security contexts, non-root containers, seccomp, resource requests/limits, Kyverno admission policies, External Secrets patterns

CI/CD & DevSecOps: Jenkins, Azure DevOps, GitHub Actions, GitLab CI/CD, SonarQube, Trivy, CodeQL, OWASP ZAP, Dependency-Check, Checkov, secret scanning, IaC scanning, SBOM generation, artifact provenance

Observability & Reliability: Prometheus, Grafana, OpenTelemetry, Loki, Tempo, ELK, Alertmanager, SLIs/SLOs, error budgets, burn-rate alerting, Four Golden Signals, incident response, RCA

Identity & Secrets: Keycloak, OAuth2 Proxy, HashiCorp Vault, least privilege, authentication/authorization, TLS/SSL, certificates, secret management

Data, Messaging & Recovery: PostgreSQL, Row-Level Security (RLS), connection pooling, migrations, SQL Server, Redis, Kafka, MinIO, Ceph, Longhorn, encrypted backups, GPG/AES-256, SHA-256 integrity verification, restore verification, disaster recovery, Velero

Systems & Automation: Linux, Ubuntu, RHEL, CentOS, Windows Server, Bash, Python, PowerShell, networking, REST APIs, JSON
